21 Series DC Diaphragm Ag Pump

The 21 Series Pumps are compact and designed for a wide range of applications including liquid transfer, spraying, circulation, filtration and dispensing. The 21-series of diaphragm pumps are self-priming and can be run dry without harm. Miniature multi outlet water pressure pump serves 1 or 2 3/8" (10 mm) outlets at any one time. This compact automatic demand water system pump has a built-in pressure switch, which automatically starts and stops the pump when faucet is opened and closed.

Type	2 Chamber positive displacement diaphragm pump, self priming, capable of being run dry
Valve / Diaphragm	Viton / Santoprene
Control Type	Pressure switch
Max Recommended Temperature	60° C (140° F)
Priming Capabilities	1.2m (4 feet) suction lift
Re-start Pressure	Shut-off Pressure 35 PSI: 25 PSI \pm 5 PSI (\pm 0.3 bar)
	Shut-off Pressure 40 PSI: 30 PSI \pm 5 PSI (\pm 0.3 bar)
	Shut-off Pressure 70 PSI: 56 PSI \pm 5 PSI (\pm 0.3 bar)
Inlet/Outlet Ports	3/8" (10 mm) hose barb
Wire Connections	2-Pin Leads
Weight	0.6 kg

22 Series DC Diaphragm Ag Pump

The SEAFLO 22 series pumps are your best choice when looking for a high performance diaphragm pump at an economical cost. Simple but highly versatile, the Seaflo 22 series pumps are perfect for fluid handling applications such as purification, light industrial, food and beverage, agricultural, and automotive. Additionally, it's packed with features and capabilities you'll never find in other pumps at this price point. The 22-series of diaphragm pumps are self-priming, can be run dry without harm and have an internal bypass feature which reduces pump cycling.

Type	2 Chamber positive displacement diaphragm pump, self priming, capable of being run dry
Valve / Diaphragm	Viton / Santoprene
Control Type	Pressure switch
Max Recommended Temperature	60° C (140° F)
Priming Capabilities	1.2m (4 feet) suction lift
Re-start Pressure	Shut-off Pressure 60 PSI : 48 PSI \pm 5 PSI (\pm 0.3 bar)
	Shut-off Pressure 80 PSI : 65 PSI \pm 5 PSI (\pm 0.3 bar)
	Shut-off Pressure 100 PSI : 75 PSI \pm 5 PSI (\pm 0.3 bar)

33 Series DC Diaphragm Ag Pump

The SEAFLO 33 series pumps are capable of continuous heavy duty and extreme workloads. Matched with high performance motor, the 33 series has extreme chemical capability and goes beyond the normal call of duty with many other additives as well. This 3-chamber diaphragm pump provides up to 11.6 litres per minute and is capable of self-priming up to 1.8 vertical meters, and can run dry without damage. They are easy to install, service and winterize. Seaflo also offers a variety of easy connect fittings and filters.

Type	3 Chamber positive displacement diaphragm pump, self priming, capable of being run dry
Valve / Diaphragm	Viton / Santoprene
Control Type	Pressure switch
Max Recommended Temperature	60° C (140° F)
Priming Capabilities	1.8m (6 feet) suction lift

35 Series DC Diaphragm Ag Pump

The 35 series pumps are capable of continuous heavy duty and extreme workloads. Matched with high performance motor, the 35 series has extreme chemical capability and goes beyond the normal call of duty with many other additives as well. It provides reliable performance in moderate water flow, high-pressure applications. This 3-chamber diaphragm pump provides up to 7 Litres per minute and is capable of self-priming up to 1.8 vertical meters, and can run dry without damage.

Type	3 Chamber positive displacement diaphragm pump, self priming, capable of being run dry

41 Series DC Diaphragm Ag Pump

The 41-Series pump provides high volume water flow with reduced pump cycling, thanks to the quad chamber diaphragm and internal bypass. The Four-chamber high volume design, driven by a heavy-duty motor, produces flow rates of 12.5 to 17.0 LPM, With on-demand switching. The 41-Series pumps are self-priming, and can run dry without damage, performance reliable and low current. Seaflo also offers a variety of Easy Connect fittings and filters

51 Series DC Diaphragm Ag Pump

An economical workhorse, the 51 series are engineered for flexibility. The 51-Series is our Heavy-Duty water pump. It provides high volume water flow with reduced pump cycling, thanks to the large five-chamber diaphragm. With on-demand switching, 11.5 LPM, and 60 PSI, the 51 series will meet your special requirements with positive predictable performance. The 51-Series pumps are self-priming, and can run dry without damage, performance reliable and low current.

Type	5 Chamber positive displacement diaphragm pump, self priming, capable of being run dry
Valve / Diaphragm	Viton / Santoprene
Control Type	Pressure switch

53 Series DC Diaphragm Ag Pump

Demanding industrial pump environments require precise engineering and quality components—the 53 Series was designed with both. To maximize the potential of all five diaphragm chambers, Seaflo matched it with a high torque, completely sealed motor. It provides high volume water flow with reduced pump cycling, thanks to the large five-chamber diaphragm. Due to its robust motor and heavy-duty construction, it's a popular choice for use with tough agricultural applications. For its size, it is one of the most powerful and productive diaphragm pumps you can buy, pumping up to 26.5 LPM. If your specifications call for low noise, smooth operation, continuous operation and high capacity, the 53 Series will meet the challenge. Compact design and plug-in port fittings

55 Series DC Diaphragm Ag Pump

The 55 Series is our Heavy-Duty water pump. It provides high volume water flow with reduced pump cycling, thanks to the large five-chamber diaphragm. These models are designed to run on water systems with no accumulator tank necessary, and up to five fixtures. It is also suited for use with a holding tank water system, as may be found in a boat, RV or remote cabin. All are fitted with a built-in pulsation dampening by-pass to control unwanted cycling and noise. The 55-Series pumps are self-priming, and can run dry without damage, performance reliable and low current. This automatic demand water system pump has a built-in pressure switch, which automatically starts and stops the pump when the faucet is opened and closed. They are easy to install service and winterize.

The SEAFLO 16 liters 12-volt knapsack sprayer with rechargeable battery sprayer; wide filling neck, rugged shut-off gun, adjustable nozzle, in-built pressure filter, brass lance. The number one choice for spraying and landscape maintenance professionals, specially designed for everyday use. It is a handy and easy alternative to hand sprayers.

Model	SFAESR-16A-01
Pump	2.6 LPM / 70PSI
Battery	12 V / 4A
Sprayer Hose	1.2 M
16 L Tank	Strong, easy to clean blow mold UV Stabilized PE tank for long life
3-stage Filtration	Large filling screen under lid; large suction filter; pressure filter in lance handle
Large Filling Lid	Helps prevent spillage when filling
Duty Cycle	Intermittent
Sprayer Lance	Rugged brass lance with angled nozzle holder for perfect spray distribution at the correct height
Double Nozzle	Increase the spray range, reduce the spray time
Fan Nozzle	Sprinklers can spread out the water in the middle, increase the spray range
Product Size / Weight	550 x 330 x 220 mm / 6.6 kg
List Price	\$248.00

ATV Spot Sprayer 50L & 100L

The SEAFLO 12 Volt Sprayers covers from 50L to 100L capacity HDPE stabilizer polyethylene tank and are supplied as a self contained complete unit. These new SEAFLO 12V sprayers deliver constant flow, no pulsation and the highest pressure for distance spraying.

Gear Pump

SEAFLO gear pumps are positive displacement pumps, capable of operation in either direction. They may be used to perform a variety of oil transfer applications (DO NOT USE FOR UNLEADED or other combustible fluids). We use robust motors, stainless steel shafts and rugged metal gears. Our tough design provides performance that you can rely on for years.

Features & Benefits

Perfect for pumping oil.
Metal pump head.
Metal gears.
Sealed motor design.

Thermally Protected Motor.
Self-priming.
Stainless Steel shaft.

G500 & G750 Sump Pump

SEAFLO 12V Electric Marine Submersible non-automatic bilge pumps offer water evacuation activated by a panel or float switch. Include Anti-Airlock protection and exclusive moisture tight seals, marine grade blocked wiring. Our larger impeller design and more robust motor allow us to outperform our competitors.

Our removable strainer base fits industry standard mounting conventions though, so you'll have no problem changing to us from them.

Features & Benefits

- Entirely submersible
- Snap-off strainer base
- Stainless steel shaft
- Anti-Airlock protection
- Exclusive moisture tight seals
- Marine grade blocked wiring
- Quiet operation

SEAFLO non-automatic 1500GPH bilge pumps offer standard action activated by a panel or float switch. Small size, high efficiency, low current (low cost switching power supply supporting). Removable strainer for easy replacement or in the event that the pump becomes clogged with debris. Available for DC 12 Voltage & 24 Voltage.

Features & Benefits

- Entirely submersible
- Snap-off strainer base
- Stainless steel shaft
- Anti-Airlock protection
- Exclusive moisture tight seals
- Marine grade blocked wiring
- Quiet operation

G4700 Sump Pump

SEAFLO non-automatic 4700GPH bilge pumps with high efficiency.,heavy duty motors, offer high capacity output. Very powerful pump. Works great and drains pretty fastQuick release strainer for easy maintenance,.Apply for water sampling, high-volume liquid transfer, low-noise continuous workplace; Large aquarium, small swimming pool, water reservoirs, fountains and many other occasions.12v Boat Marine Plumbing Electric Bilge Pumps

Portable Washdown Kit

The portable washdown system is designed for most of the wash down outdoor application. The high performance and easy installation makes it easier to use, even by a child. The design makes it unnecessary to carry a tank when you use it.

Benefits and Features

6m x 12mm UV-protected Coiled Hose

2.4m Wiring Harness with Cigarette Lighter Plug

Adjustable sprayer

Smooth flowing

EPDM - Valve

Case size - 428 x 374 x 126 mm

Total weight - 5 kg

2m Inlet hose

Seaflo Series 41 Diaphragm Pump

Easy to use, store, and carry on

Built-in by pass valve

Quiet Operation

Santoprene - Diaphragm

Tool case, easy to use, store and carry on.

2.4m wiring harness for car cigarette charger.

6m UV-protected coiled hose coil.

Adjustable pressure switch from 17~70 psi for OEM when needed. By-pass reduces noise, strain on the pipes, and wear on the pressure switch.

Quick attach connections with 360° multiple fittings allow ease connection to any outlet.

2m inlet hose.

Adjustable spray gun, idea for cleaning leisure boats, fish boxes, anchor chains and dinghies.

Washdown Pump Kit

Our heavy-duty washdown kit. The best choice for cleaning pool, wall, window, machines and other similar applications. This pump boasts a huge 5 GPM capacity. This pump has an on-demand switch, so the pump automatically turns on when you squeeze the spray gun handle. With 70 PSI cutoff, this has the pressure to get rid of stubborn debris. Suitable for fresh and saltwater applications.

Benefits and Features

6m x 12mm UV-protected Coiled Hose

Adjustable sprayer

Seaflo Series 51 Diaphragm Pump

Quiet

Inlet Strainer

Smooth

Multi-step corrosion protection and seamless motor body for enhanced protection in any wet environment

Threaded connections with multiple fittings allow connection to any outlet

Supplied complete with hose, trigger nozzle, fittings and strainer

Self-priming with adjustable pressure switch from 17-70 psi for OEM when needed

Idea for cleaning leisure boats, fish boxes, anchor chains and dinghies

List Price	\$62.90			

24V Submersible Solar Deep Well Pump

The SEAFLO submersible solar deep well pump is a positive displacement diaphragm type 24VDC pump of high efficiency. The pump offers a solution to your remote water pumping needs. It's rugged, durable and built to last. This pump delivers approximately 3.8 LPM at 70.1 meter total lift. It incorporates a unique, water-blocked cable connector that is impervious to water leakage and condensation problems preventing water wicking. Typical applications are in livestock watering, irrigation, ponds, islands, remote homes and cabins.

Features and Benefits

Corrosion Proof and Stainless Steel housing
Low maintenance design/field Repairable
Santoprene diaphragm for reliability, longer life and better priming

Runs dry without damage
Internal bypass for pump protection
Thermal overload start on 115°C, automatic restart

Section 1	Section 2	Section3	Section 4

Section 1.

Type of pump and Model. (Diaphragm Pump Model-22 series)

Section 2.

Year and month of manufacture (2005 = 2020/05 May)

Section 3.

Number in production Batch (No. 000499)

Section 4.

Voltage (12Volt 012)

1. Pump will not start or blows the circuit

- *The first thing would be to look at the electrical circuit. This includes checking the fuse, switch, circuit breaker, and the earth. If you are running off batteries, make sure you are obtaining correct voltage.
- *Check to see if the pump is hot. It could simply have stopped due to the thermal breaker being triggered. Wait until it cools down.
- *If your pump has spent the night in below freezing conditions such as those experienced in some parts of alpine Australia, it could be that the water against the pump diaphragm has frozen causing it to seize. Wait for it to thaw.
- *If you have voltage present at the switch, try bypassing the pressure switch. Does the pump operate?
- *Check your pump is getting correct voltage.

2. Pump runs but will not prime and splutters

- *Check the water level of your tank. It is not as silly as it sounds.
- *It is common that the strainer or inline filter has become clogged with foreign debris. If this happens it will stop the follow of water to the pump. Simply clean or replace the filter
- If you are using a hot water system, air could have built up within your hot water tank producing an air lock. Release the pressure from your tank, refer to your HWS owner's manual.
- *Check your plumbing connections. If they have become loose, they could very well be causing a vacuum leak.
- *Check your hose to make sure no kinks have appeared, and that all your valves are functioning correctly.

3. Pump rapid cycles

- *The major cause of rapid cycling is restrictive plumbing. This can be restrictive taps and shower heads or kinked hoses.
- *If you are running a water filter or purifier then this should be installed on a separate line feed. Do not purify all your water.

4. My pump will not shut off or runs when taps are closed

- *Check your plumbing's pressured side for leaks, dripping taps, or if you have a plumbed
- *Check your pump is receiving the correct voltage.
- *Check the pump head screws have not worked loose.
- *Possible debris is causing valves to stay open.

5. Pump is noisy or running rough

- *Check plumbing has not worked loose or become kinked
- *Clean out your strainer from any foreign debris.
- *Is your pump plumbed using flexible hose and mounted correctly?
- *Bleed your plumbing system of any air.
